

LitterBoss™

*Rider Operated
Litter Sweeper/Vacuum*

Side broom arms retract in and out when contact is made with protruding objects.

Outstanding performance on bulk litter,
dirt and fine sand.

Minuteman®
PowerBoss®

LitterBoss™

Ideal for: Hospitals, Schools & Universities, Sports Centers, Shopping Malls, Parking Structures and Business Parks.

The LitterBoss is the ultimate solution to litter pick-up problems. With the convenience and comfort of a **ride-on for the price of a walk-behind**, the LitterBoss can sweep and vacuum litter virtually anywhere it collects. The ride-on design minimizes operator fatigue so the operator can clean longer and cover more area than with a walk-behind. The LitterBoss was designed to **climb curbs up to 9 inches** high and it will pick up broken glass, soda cans, cigarette butts, leaves, etc., without difficulty from sidewalks, curbs, parking lots, alleys and landscaped areas. The **12 foot accessory hose** vacuums debris in hard-to-reach areas such as under and around picnic tables and benches, shrubbery, lamp posts, signage, and fences.

The LitterBoss' patent-pending, two **multi-articulating side broom arms** retract in and out and the hydraulic side broom motors raise and lower the brooms simply with the push of a button. The brooms rotate to sweep litter towards the center vacuum shoe. Side debris containment flaps keep litter from escaping. Debris is shredded by the modified radial, hardened steel impeller, thus, maximizing the hopper collection capacity. **Emptying the debris hopper** is effortless and clean, unlike any other litter vacuum on the market. The unique design of the LitterBoss' collection system utilizes a disposable bag in the hopper to contain the debris while dumping without spillage.

The LitterBoss features a patent-pending **air regeneration system**, which prolongs sweeping efficiency even when the panel filter is full. The LitterBoss is equipped with front mounted **spray jets** that emit a light mist on demand to further insure dust control while sweeping.

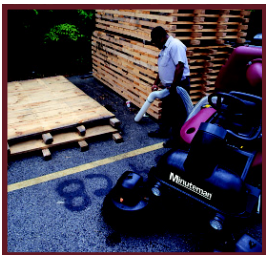

The LitterBoss' ergonomically designed operator's seat is positioned

for **optimum visibility and accessibility** to the controls. As a safety feature, the machine will not start unless the operator is seated. The mechanical parking brake is another safety feature and must be set when the operator needs to use the accessory bulk pick-up hose. The blower interlock prevents the impeller from operating while the debris hopper is being emptied.

The LitterBoss comes standardly equipped with a tilt steering wheel, front headlights to enhance visibility in low-light situations. The instrument panel features oil, temperature, gas and battery gauges, a high/low switch for rpm idle, an impeller switch, horn and cup holder. The LitterBoss has the ability to **navigate through difficult environments** and around obstacles and can make turns on its own axis.

Performance, efficiency and comfort combine to make the LitterBoss the answer to litter issues while creating a cleaner environment wherever it goes.

Bulk pick-up hose vacuums litter in hard-to-reach areas.

With it's 9 inch curb clearance, the LitterBoss moves from street to sidewalk with ease.

When needed, spray jets mist the surface before sweeping to control dust.

Litter disposal is quick, simple and neat.

SPECIFICATIONS

SWEEP PATH	68" (1.73 m) with dual side brooms	SPEED	0-8 mph (0-12 kil.)
BRUSH DIAMETER	(2) 26" (.66 m)	STEERING SYSTEM	Rear wheel hydraulic power assist
WATER RESERVOIR VOLUME	23 Gallons (87 Liters)	BRAKES	Hydrostatic/mechanical foot brake Mechanical hand brake
HOPPER CAPACITY	30 Gallons (114 Liters)	DIMENSIONS (LxWxH)	95" x 42.5" x 67" (2.4m x 1.1m x 1.7m)
HYDRAULIC RESERVOIR CAPACITY	6 Gallons (23 Liters)	WHEELBASE	45" (1.1m)
FUEL TANK	7 Gallons (26 Liters)	WEIGHT	1,650 lbs. (748 kg)
DUST CONTROL	Spray jets at side brooms, washable exhaust filter and disposable/reusable collection bag	WHEELS (Front)	(2) 23" x 9.5" x 12" (.58m x .24m x .30m) 4 ply, pneumatic turf type
VACUUM IMPELLER	Belt-driven, w/electric clutch (3700 rpm), 11" (.28m) diameter modified radial, hardened steel blades	WHEEL (Rear)	(1) 18" x 6.5" x 8 (.46m x .17m x .20m) 4 ply, pneumatic turf type
CFM	1600	BULK PICK-UP HOSE	12' (3.7 m) hose, 4" (.10m) diameter
ENGINE	Kubota D722 44 CID Diesel 20.9 HP	OPTIONS	Rollover Safety Protection (R.O.P.), Road-Ready package, back-up alarm and warning beacon
TRANSMISSION	Variable displacement hydrostatic
